

Corporate ownership and control of local media has gone well beyond corrupt and stifling of independent programming, live broadcasting and suppression of progressive political discussion around the country. This ownership should be DRAMATICALLY cut back in every market to allow independent stations and programming access to the PUBLIC airwaves. Precisely because of this resource being public, it should not be monopolized and in fact should be re-regulated to facilitate independent, local ownership with the focus being to reduce corporate ownership to less than 10% of any market to ensure true competition.

Your noticing is horrendous with multiple reference numbers clearly designed to confuse the respondents and discourage participation in this process. Shake off the corporate haze in your vision and correct this ridiculous crap of playing politics with out public resources
